Fume Hoods

Products Posted: August 03, 2012

LM Air Technology's polypropylene fumehood product line is UL 1805 classified. The PFH series has been designed to function at the current lower face velocities and can be used as variable flow or constant volume hoods. A flush design is incorporated into the front face and counterbalanced sash including the under sash mounted airfoil. The hoods are available at 34 in deep (fitting through standard door openings) and widths from 3 to 8 ft. Vented base cabinets are incorporated and integral to the hood.
